

Dear Hiring Manager,

My name is **Miguel Ángel Henao Cañas** and I am writing to apply for the **Data Analyst** position within your organization. I am completing my degree in **Systems Technology** at Institución Universitaria Salazar y Herrera and bring recent, hands-on experience as a **Data Quality Analyst / QA Engineer** at **Quipux**, where I worked directly with high-demand transactional systems in production.

During my time at Quipux, I ran **advanced SQL queries** across millions of records to identify anomalies, duplicates, and inconsistencies, designed **data quality** validations covering completeness, uniqueness, consistency, and timeliness, and integrated validation controls into **CI/CD pipelines**, collaborating in agile Scrum cycles. This experience gave me a clear understanding of how reliable data underpins sound business decisions.

I complemented this foundation with a portfolio of personal projects covering the full data analysis cycle: from modeling and extraction with **SQL and Python**, to executive visualization with **Power BI** and, in my sports analytics project, building **Machine Learning** models evaluated through backtesting.

CERTIFICATIONS IN DATA SCIENCE & BI

WHY I CAN ADD VALUE TO YOUR TEAM

- Real experience with **production transactional data**, not just academic or sandbox environments.
- Command of the full data chain: **advanced SQL, Python (pandas/NumPy), Power BI, and data quality control**.
- Ability to translate technical findings into **quantifiable business impact**, documented across every project in my portfolio.
- Experience collaborating in **agile teams (Scrum)** alongside engineering and business stakeholders.

PROJECT PORTFOLIO

Fintech Fraud Detection

Transactional risk score with SQL, Z-score/outlier analysis in Python, and an executive Power BI dashboard.

[github.com/HenaoM7/Analisis_De_Fraude](#)

Data Quality Audit

Detection of duplicates, nulls, and inconsistencies using advanced SQL, with quantified financial impact.

[github.com/HenaoM7/Analisis_De_Datos_Sistemas_Trasaccionales](#)

Profitability Analysis & KPIs

Revenue, margin, and LTV on a PostgreSQL model, with customer segmentation in Python and a regional dashboard.

[github.com/HenaoM7/Analisis_De_Rentabilidad](#)

AI Betting — Predictive ML

XGBoost + LightGBM models trained on ~7,230 historical matches, with temporal backtesting and a Next.js + FastAPI dashboard.

I would welcome the opportunity to discuss how my profile can contribute to your data team's goals. I have attached my resume with details of my experience, projects, and certifications, and I am available to schedule an interview at your convenience. Thank you for your time and consideration.

Sincerely,

Miguel Ángel Henao Cañas
